## Summary

To obtain an Spring/Summer intern position that will allow me to utilize my problem-solving skills to further develop my abilities in the field of Software Engineering.

## Education

- **Bachelor of Science in Computer Science** **December 2019**  
The University of Texas at Dallas - Richardson, Texas **GPA: 4.00**
- **Associate of Science in Software Engineering** **May 2017**  
Richland College - Dallas, Texas **GPA: 4.00**

## Professional Experience

- |  |                                     |                                 |
|--|-------------------------------------|---------------------------------|
| <b>Cloud Engineering Intern</b>  | <b>BizCloud Experts, Lewisville</b> | <b>September 2018 – Present</b> |
| <ul style="list-style-type: none"><li>• Supported the maintenance and updating the frontend of internal applications using Angular and AWS S3</li><li>• Developed a reservation system with voice enabled device, Alexa, and AWS lambda</li><li>• Tested and maintained serverless software products in AWS Lambda to ensure strong functionality and optimization</li><li>• Worked closely with AWS certified solution architect to obtain AWS CSA – Associate</li></ul>  |                                     |                                 |
| <b>Full Stack Engineer Intern</b>  | <b>CITT Services, Dallas</b>        | <b>May 2018 – August 2018</b>   |
| <ul style="list-style-type: none"><li>• Served Flask Applications with Gunicorn and Nginx on GCP, Ubuntu 16.04</li><li>• Initiated Jenkins to detect changes made on GIT repositories and to execute Shell Scripts to automate integration; eliminated error possibilities when manually deploying and encouraged time efficiency for all of CITT Services</li><li>• Developed automation using Dialogflow; created a Chat Bot that communicates with customers and automatically redirect their concerns with the appropriate response action; this implementation was arranged on Slack train the bot and to allow passing over a bot flow to human interaction on Slack</li></ul> |                                     |                                 |

## Skills

- **Programming Languages:** Python, SQL, JAVA, HTML5, CSS3, JavaScript, C/C++
- **Tools:** GCP, Jenkins, Git, Shell/Bash, Node.js, Angular, jQuery, Bootstrap, MySQL, NoSQL
- **AWS:** EC2, S3, Lambda, API gateway, RDS, DynamoDB, VPC

## Academic Projects

- |  |                    |
|--|--------------------|
| <b>Mobile Attendance-taking Application (CS3354: Software Engineering, Grade: A+)</b>  | <b>Spring 2018</b> |
| <ul style="list-style-type: none"><li>• Designed and planned a mobile application which utilizes Geolocation and Facial Recognition to take a class attendance, using Swift for iOS and Kotlin for Android</li><li>• Successfully modernized the conventional attendance-taking system and increase the efficiency of the process to yield more teaching time</li><li>• Co-author with Dr. Ebru Cankaya and three other computer science students to write a paper. The paper is accepted as a Late Breaking Paper at FECS'18; ISBN: 1-60132-477-4</li></ul> |                    |
| <b>Dropbox (CS3377: Unix/Linux Environment, Grade: A)</b>  | <b>Spring 2018</b> |
| <ul style="list-style-type: none"><li>• Implemented Dropbox in Linux that monitors changes to files and directories. Written in C++ and used several techniques such as parsing, signal handling, process control, piping, and inotify</li></ul>   |                    |

## Personal Projects

- |   |                    |
|---|--------------------|
| <b>Auto class recommender</b>   | <b>2017 - 2018</b> |
| <ul style="list-style-type: none"><li>• It gives recommended classes in a selected degree plan based on classes taken</li><li>• Applied graph theory using NetworkX with graphical user interface in Tkinter, written in Python</li></ul> |                    |

## Relevant Courses

- |   |                    |
|---|--------------------|
| • Data Structure and Algorithm Analysis | • Computer Network |
| • Computer architecture                 | • Operating System |
